News From the Oasis...

Nov. 2015

We have been hard at work implementing new strategies, procuring new products, and processing all of our customers valued orders from across Canada. It's time to take a break, and bring you up to date with what's new and exciting at Desert Air Products Inc.

- Our hooded sweatshirt campaign is always a great success. Remember, place any order for \$4000 or more and get yours today.*
- We have negotiated very competitive pricing on the highest quality North American made activated alumina desiccant. Now packaged in convenient 25 lb bags and available in 1/8" and 3/16" sizes. (\$1.30/ lb NET)*
- We have access to most OE or better spare parts and elements for the complete line of Airtex refrige and regen air dryers. Our parts are competitively priced and most common parts are in stock on our shelves. Be sure to visit our new website www.airtekparts.com*
- After a brief hiatus, the MAC AIR line of refrigerated air dryers is once again part of our product portfolio. These units are American made, robust and simple in their design and carry a 5 year warranty.*
- We have extended our current sales promotion on 1/4" electronic timed auto drain/strainer combo until after the new year. (\$45 NET ea.)*

We truly appreciate your continued support and value the partnerships that we have established. Our continuing pledge is to provide you with the best products available today as well as all of the support and service that you deserve.

*Cheers and best regards!
Desert Air Products Inc.*
